

Greetings:

I am against the NAB's petition 04-160 to limit the use of SDARS repeaters to only national content. I am a subscriber to XM radio, and find it to be the only technology which can offer the music and news content I want to listen to in my car. As long as XM remains a subscription service, I am free to cancel my subscription if I hear anything that I find offensive, and therefore I see no reason for the FCC to be involved in controlling the type of content I can listen to. Please allow me to continue to have the right to purchase the type of content that I wish to hear. Thank you.
